

Stone Brook

[Professional trail course design and management]

If you have ever watched a western trail class, you know how a trail course looks when it is set up in the arena. Poles, water boxes, bridges, cones, brushes and flower boxes are spread about the ring in a maze like manner. It may look chaotic, but there is a method to this madness. Trail course patterns are well thought out, measured for correct striding and diagrammed for a precise ride!
